Question 1

1 / 1 pts

Policy

☐

The framework, functions, and processes that guide project management activities in order to create a unique product, service, or result to meet organizational, strategic, and operational goals.

☒

A structured pattern of actions adopted by an organization such that the organization's policy can be explained as a set of basic principles that govern the organization's conduct.

☐

An activity that can be planned and measured and that yields a specific output. [Note: Discrete effort is one of three earned value management (EVM) types of activities used to measure work performance.] Discretionary dependency. A relationship that is established based on knowledge of best practices within a particular application area or an aspect of the project where a specific sequence is desired.

☐

In the critical path method, the latest possible point in time when the

in the critical path method, the latest possible point in time when the uncompleted portions of a schedule activity can start based on the schedule network logic, the project completion date, and any schedule constraints.

Question 2**1 / 1 pts****Enterprise environmental factors**

Conditions not under the immediate control of the team that influence, constrain, or direct the project, program, or portfolio.

A collection of procedures used to track project artifacts and monitor and control changes to these artifacts.

A formal or informal approach to elicit information from stakeholders by talking to them directly.

A discipline concerned with the way individuals, groups, and organizations develop knowledge.

Question 3**1 / 1 pts**

A collection of procedures used to track project artifacts and monitor and control changes to these artifacts.

Code of accounts

Configuration management system

☐ Organizational process assets

☐ Estimate costs

Question 4

1 / 1 pts

A structured pattern of actions adopted by an organization such that the organization's policy can be explained as a set of basic principles that govern the organization's conduct.

☐ Enterprise environmental factors

☐ Colocation

☒ Policy

☐ Matrix organization

Question 5

1 / 1 pts

A defined function to be performed by a project team member, such as testing, filing, inspecting, or coding.

☐ Resource calendar

☒ Role

☐ Policy

☐ Information management systems

Question 6

1 / 1 pts

Question 6

1 / 1 pts

Conditions not under the immediate control of the team that influence, constrain, or direct the project, program, or portfolio.

- ☐ Procedure
- ☐ Request for quotation (RFQ)
- ☒ Enterprise environmental factors
- ☐ Data date (DD)

Question 7

1 / 1 pts

The person assigned by the performing organization to lead the team that is responsible for achieving the objectives of a defined work effort.

- ☐ Sponsor
- ☒ Project manager (PM)
- ☐ Product owner
- ☐ Project management office (PMO)

Question 8

1 / 1 pts

A partially complete document in a predefined format that provides a defined structure for collecting, organizing, and presenting information and data.

- ☐ Change Management Plan
- ☐ Configuration management system

- ☒ Templates
- ☐ Secondary risk

Question 9**1 / 1 pts****Historical information**

- ☐ Any organizational structure in which the project manager shares responsibility with the functional managers for assigning priorities and for directing the work of persons assigned to the project.
- ☒ Documents and data on prior projects including project files, records, correspondence, closed contracts, and closed projects.
- ☐ See logical relationship.
- ☐ An established method of accomplishing a consistent performance or result, a procedure typically can be described as the sequence of steps that will be used to execute a process.

Question 10**1 / 1 pts****Organizational process assets**

- ☐ A component of the resource management plan that describes when and how team members will be acquired and how long they will be needed.

A process whereby modifications to documents, deliverables, or baselines associated with the project are identified, documented, approved, or rejected.

A condition or capability that will be used to assess conformance by validating the acceptability of an attribute for the quality of a result.

Plans, processes, policies, procedures, and knowledge bases that are specific to and used by the performing organization.

Question 11**1 / 1 pts****Configuration management system**

Conditions not under the immediate control of the team that influence, constrain, or direct the project, program, or portfolio.

The process of determining, documenting, and managing stakeholder needs and requirements to meet project objectives.

A collection of procedures used to track project artifacts and monitor and control changes to these artifacts.

Approaches to presenting information with logical linkages that aid in understanding.

Question 12**1 / 1 pts**

Question 12

An established method of accomplishing a consistent performance or result. This can be described as the sequence of steps that will be used to execute a process.

- ☒ Procedure
- ☐ Gantt chart
- ☐ Project management office (PMO)
- ☐ Checklist analysis

Question 13**1 / 1 pts**

Project manager (PM)

- ☒ The person assigned by the performing organization to lead the team responsible for achieving the objectives of a defined work effort.

Question 14**1 / 1 pts**

Expert judgment

- ☒ Judgment provided based upon expertise in an application area, knowledge area, discipline, or industry as appropriate for the activity being performed. Such expertise may be provided by any group or person with specialized education, knowledge, or skill.

Question 15**1 / 1 pts**

Plans, processes, policies, procedures, and knowledge bases that are specific to and used by the performing organization.

- ☐ Risk appetite
- ☒ Organizational process assets
- ☐ Monitoring and Controlling Process Group
- ☐ Historical information

Question 16**1 / 1 pts**

Documents and data on prior projects including project files, records, correspondence, closed contracts, and closed projects.

- ☐ Scope creep
- ☐ Change Control
- ☒ Historical information
- ☐ Authority

Question 17**1 / 1 pts**

Procedure

- ☐ Plans, processes, policies, procedures, and knowledge bases that are specific

to and used by the performing organization.

☐ See project charter.

The process of subdividing project deliverables and project work into smaller, more manageable components.

An established method of accomplishing a consistent performance or result, a procedure typically can be described as the sequence of steps that will be used to execute a process.

Question 18

1 / 1 pts

A process whereby modifications to documents, deliverables, or baselines associated with the project are identified, documented, approved, or rejected.

☐ Practice

☐ Templates

☐ Backward pass

☒ Change Control

Question 19

1 / 1 pts

A management structure that standardizes the project-related governance processes and facilitates the sharing of resources, methodologies, tools, and techniques.

☐ Risk owner

- ☐ Risk acceptance
- ☒ Project management office (PMO)
- ☐ Project governance

Question 20**1 / 1 pts****Templates**

- ☒

A partially complete document in a predefined format that provides a defined structure for collecting, organizing, and presenting information and data.
- ☐

Agreement by everyone in the group on a single course of action.
- ☐

A structured pattern of actions adopted by an organization such that the organization's policy can be explained as a set of basic principles that govern the organization's conduct.
- ☐

A meeting to examine and document the effectiveness of risk responses in dealing with overall project risk and with identified individual project risks.

Question 21**1 / 1 pts****Role**

- ☐

Documents and data on prior projects, including project files, records, correspondence, closed contracts, and closed projects.

Supporting documentation outlining the details used in establishing project estimates such as assumptions, constraints, level of detail, ranges, and confidence levels.

A defined function to be performed by a project team member, such as testing, filing, inspecting, or coding.

A grid that shows the project resources assigned to each work package.

Question 22

1 / 1 pts

Decisions based upon experience in an application area, knowledge area, discipline, industry, etc., as appropriate for the activity being performed. Such experience may be provided by any group or person with specialized education, knowledge, skill, or training.

Conditions not under the immediate control of the team that influence, constrain, or direct the project, program, or portfolio.

The meetings with prospective sellers prior to the preparation of a bid or proposal to ensure all prospective vendors have a clear and common understanding of the procurement. Also known as contractor conferences, vendor conferences, or pre-bid conferences.

Expert judgment

The iterative process of increasing the level of detail in a project management plan as greater amounts of information and more accurate estimates become available.

Question 23**1 / 1 pts****Change Control**

Requirements imposed by a governmental body. These requirements can establish product, process, or service characteristics, including applicable administrative provisions that have government-mandated compliance.

A process whereby modifications to documents, deliverables, or baselines associated with the project are identified, documented, approved, or rejected.

A quality management and control tool used to perform data analysis within the organizational structure created in the matrix. The matrix diagram seeks to show the strength of relationships between factors, causes, and objectives that exist between the rows and columns that form the matrix.

A partially complete document in a predefined format that provides a defined structure for collecting, organizing, and presenting information and data.

Question 24**1 / 1 pts**

The framework, functions, and processes that guide project management activities in order to create a unique product, service, or result to meet organizational, strategic, and operational goals.

Role

Project governance

Proposal evaluation techniques

Stakeholder analysis

Question 25**1 / 1 pts****Project management office (PMO)**

A defined function to be performed by a project team member, such as testing, filing, inspecting, or coding.

A management structure that standardizes the project-related governance processes and facilitates the sharing of resources, methodologies, tools, and techniques.

A set of procedures that describes how modifications to the project deliverables and documentation are managed and controlled.

Includes the processes required to identify the people, groups, or organizations that could impact or be impacted by the project, to analyze stakeholder expectations and their impact on the project, and to develop appropriate management strategies for effectively engaging stakeholders in project decisions and execution.

Question 26**1 / 1 pts****Project governance**

A management structure that standardizes the project-related governance processes and facilitates the sharing of resources, methodologies, tools, and techniques.

The framework, functions, and processes that guide project management activities in order to create a unique product, service, or result to meet organizational, strategic, and operational goals.

A type of procurement document whereby the buyer requests a potential seller to provide various pieces of information related to a product or service or seller capability.

A document established by an authority, custom, or general consent as a model or example.
