

Stopwatch App Story Board

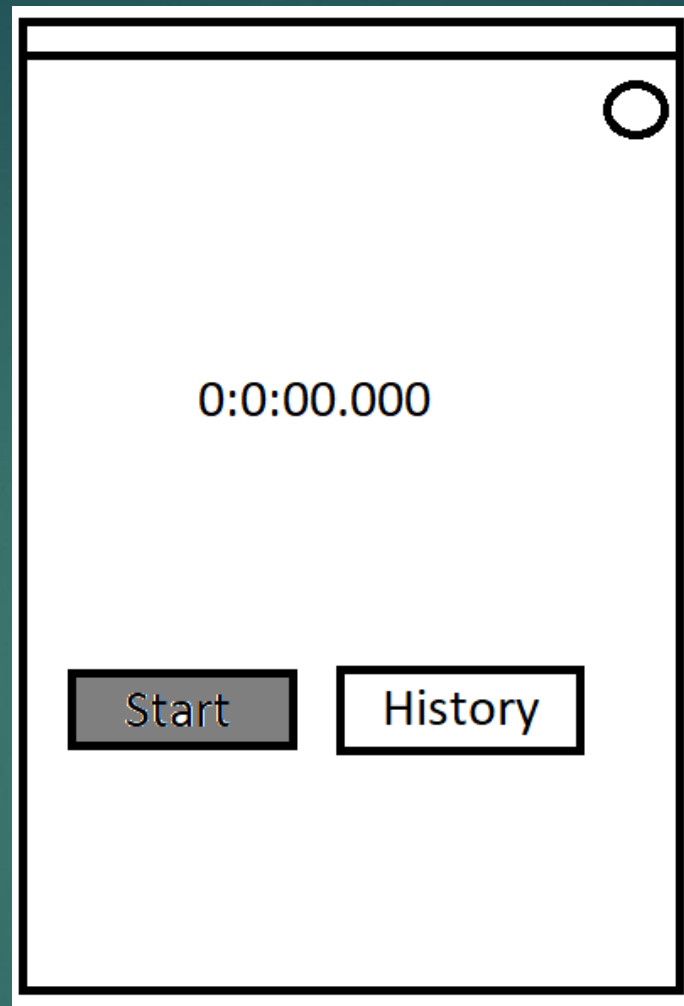

HCI – GROUP 2

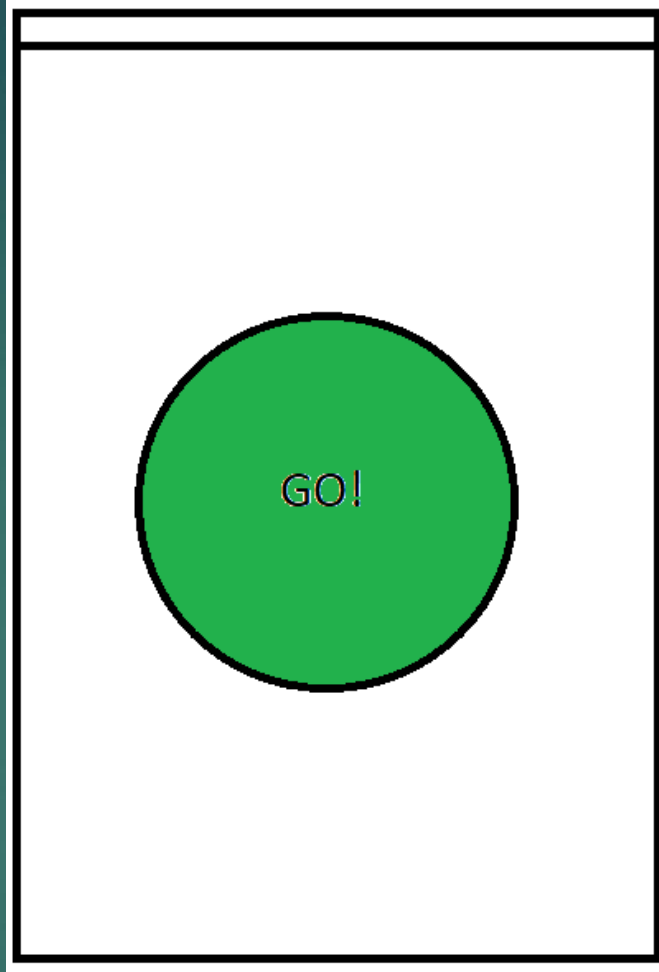

1. The user arrives at the track and opens the application

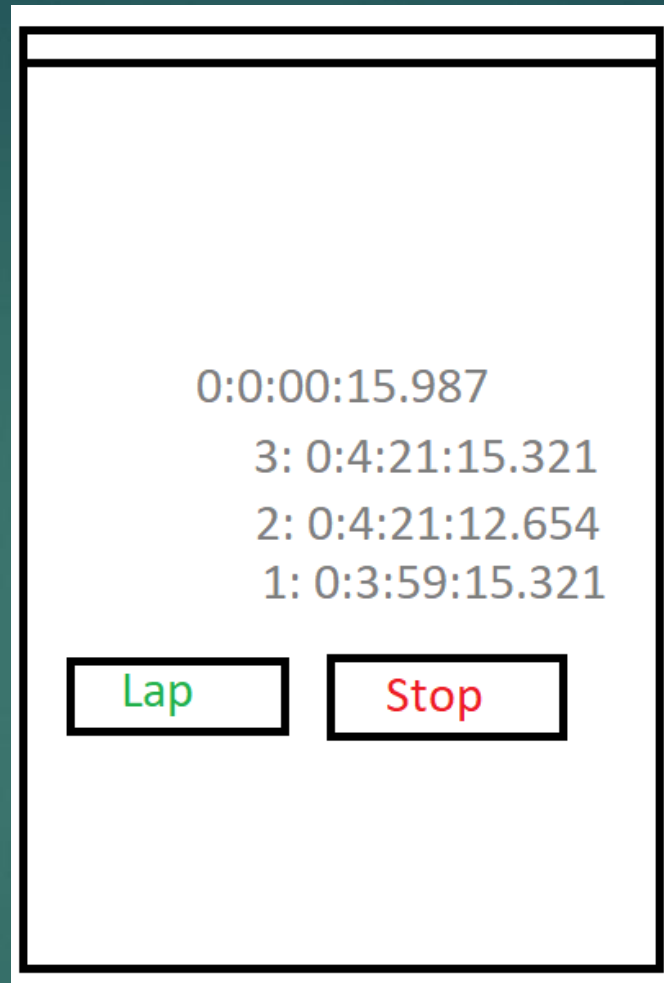

2. The user checks his times from yesterday, as well as his times from the beginning of the year to see what he needs to beat

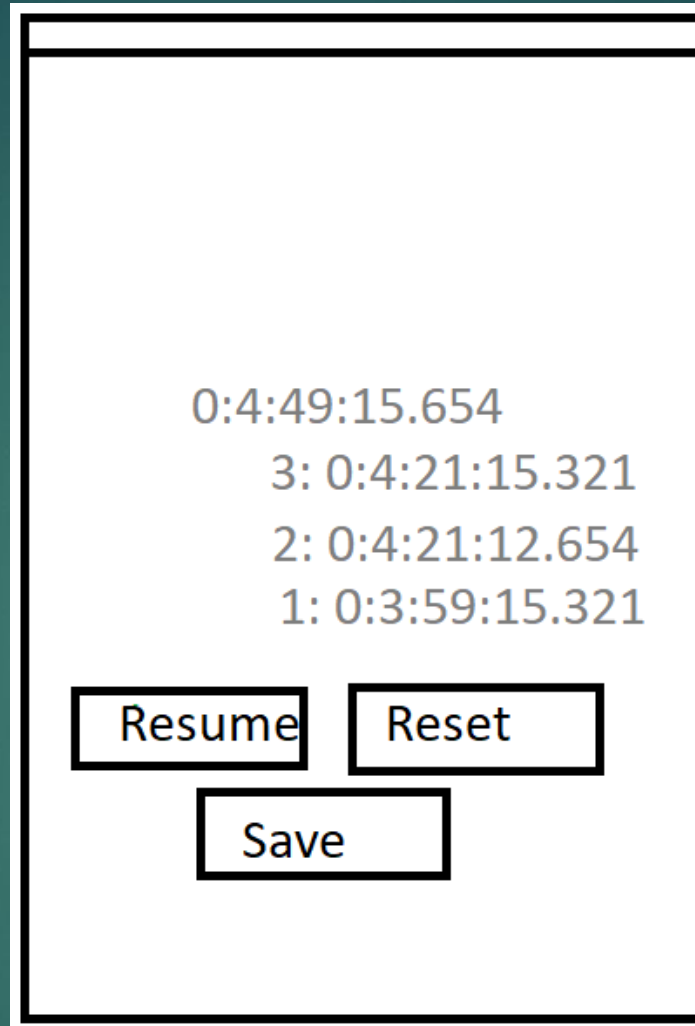

3. The user hit's start

4. The application counts down from three with sounds, and then says GO with a different chime

5. The user runs around to complete a lap, and then hits the lap button. This is repeated 3 times

6. The user finishes the fourth lap and hits stop
